

You can design a glass manifold to fit your fume hood, vacuum rack, or a special application. To fill this need we should have the following information.

1. Overall length of manifold \_\_\_\_\_.

2. Diameter of manifold body \_\_\_\_\_.

3. Single or double bank \_\_\_\_\_.

4. PTFE Valve \_\_\_\_\_.

(Recommended for application where grease may be a source of contamination.)

5. Glass Valves \_\_\_\_\_.

(See our catalog for a full range of sizes available.)

6. No. of ports \_\_\_\_\_, distance between ports \_\_\_\_\_.

Plug position right \_\_\_\_\_ or left \_\_\_\_\_

(Ports can be joints, hose connections, screw threads, etc.)

default hose connectors are supplied unless specified otherwise.
